

GRIPPING TOOL, DOSAGE TOOL AND TOOL SUPPORT  
FOR AN AUTOMATIC LABORATORY MACHINE

Abstract

5           Gripping tool for automatic laboratory machines, with gripping appliances  
for gripping vessels, an appliance for converting and/or transferring of movements,  
the power take-off of which is coupled with the gripping appliances in order to drive  
them, a coupling appliance for detachable connection with a drive appliance of a  
tool support of an automatic laboratory machine, which is coupled with the drive of  
10 the appliance for converting and/or transferring in order to drive it, and a mounting  
appliance for detachable mounting of the gripping tool on the tool support of the  
automatic laboratory machine, while the coupling appliance is connected with the  
drive appliance of the tool support.
